DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 8. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3636

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hanson (#5,000,514).

Hanson shows a collapsible rocker chair comprising a back member (40) having a top section and a base having first locking holes (46) extending through the base at a first and second distal end, a seat member (12) having second locking holes (62,64) extending through the seat member, first and second sideboards (34) having a curvilinear base, wherein each of the sideboards has a first slot (32) extending from an edge and a second slot (24) positioned substantially perpendicular to the first slot, and a first and second locking member (86,88).

Allowable Subject Matter

Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Payne, Jr. et al, Hsia, Chomik, Roland, and Lund are cited as showing similar types of collapsible rocker chair.
